SUMMARY

As a highly skilled and experienced **Front-End Developer** with over 3 years of professional experience, I have a strong track record of delivering innovative, high-quality web and mobile applications. I have expertise in modern JavaScript frameworks such as Vue and React, as well as HTML, CSS, and responsive design. I am also skilled in Agile development methodologies and have a proven ability to work effectively in fast-paced, collaborative environments. I am excited to bring my skills and experience to a dynamic organization where I can continue to grow and make a meaningful impact.

EXPERIENCE

FUSION92 | SENIOR FRONT-END DEVELOPER

March 2022 – Present | Chicago, IL

- Leading the development of the front end of web and mobile applications including **web 2.5** projects.
- Debugging and fixing issues that arise in the front end of the application.
- Participating in code reviews to ensure that the team is producing high-quality, maintainable code.
- Mentoring and providing guidance to junior developers on the team.
- Staying up-to-date with the latest front end technologies and best practices, and applying them to the development process.

FUSION92 | DEVELOPER

Oct 2020 – March 2022 | Chicago, IL

- Provide **Back-end** and **Front-end** support to clients and projects.
- Created full stack apps using **Node.js/Express** for the back end, **Nuxt.js/Vuejs** for server side rendering, and **Docker/Cypress.io** for effortlessly deployment and testing.
- Work with development team to deliver on clients expectations.

TRILOGY EDUCATION | INSTRUCTIONAL STAFF(WEB DEV BOOT CAMP)

Oct 2020 – Present | Evanston, IL

- Work with students in a class and one on one setting to ensure students success throughout the full stack boot camp.
- Topics cover in the course include **HTML5, CSS3, JavaScript, jQuery, Bootstrap, Express, React.js, Node.js, MongoDB, MySQL**, and more.

FUSION92 | SOFTWARE DEVELOPER (FREELANCE)

May 2020 – Aug 2020 | Chicago, IL

- Created and developed marketing material using **MJML**.
- Use **Email on Acid** to test and ensure generated **HTML** is fully responsive on all operation systems and email clients.
- Worked with teams of 5-10 along with other departments to ensure projects met and exceeded clients expectations.

PROJECTS

PHASER GAME | LIVE: ALEXBAILON.NET/PHASER

Using **Phaser.io** documentation, developed a desktop game where users use arrow keys on the keyboard to move character around to collect stars. As the game progresses, player will have to avoid bombs to stay alive.

WEATHER DASHBOARD | LIVE:

ALEXBAILON.NET/WEATHERDASHBOARD

A weather app that gets information from an API and displays the current and five day weather forecast for the searched city. Saves cities into local storage.

DAY PLANNER | LIVE: ALEX-BAILON.GITHUB.IO/DAY-PLANNER

A simple day planner for regular business hours. Displays current date and checks for the current hour to know if an event is past, present or in the future. This powerful planner is fully front end driven.
